

GC AMERICA PRESENTS...

THE BEST CONTINUING EDUCATION SITE

In addition to GC America's high quality products, GC offers Continuing Education programs with exceptional speakers. The best part is that all our web-based programs are FREE! Registered members can earn interactive CE Credit by signing up for the GC America Live Webinars and self-study CE Credit by viewing the on-demand modules. Additionally, our website gives you immediate access to the GC America Multimedia and Product Training Library, allowing opportunities for learning about new techniques and products.

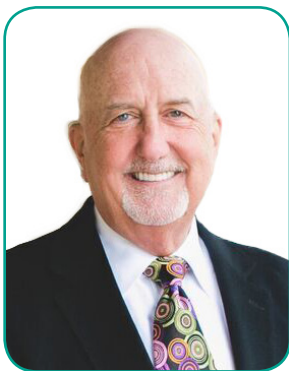

Members can take advantage of all GC America Continuing Education Site benefits:

- Live Webinars
- Product Tutorials
- Quarterly Promotions
- On-Demand Continuing Education Classes
- 24/7 Online Access
- Free Continuing Education Credits
- Staying current on all GC America Product Information

For more information regarding GC America's Continuing Education Site, visit: www.gcamerica.com/training*

*Viva Learning is an ADA CERP Recognized Provider of dental continuing education through December 31, 2021.

Check out the live monthly Continuing Education Webinars featuring GC America's Trusted Key Opinion Leaders:

- **Course Title:** MACdentistry: The What, When, How and Why of Current Indirect Restorative Materials, Adhesives and Cements
- **Course Instructor:** Dr. Thomas E. Dudney
- **Description:** As restorative materials, adhesives and cements continue to evolve, change and improve; it becomes more difficult for restorative dentists to keep up

with the latest advances. With increasingly higher patient expectations for long-term clinical success, it is important that dentists have an understanding of these materials in order to make sound decisions. This CE webinar will discuss factors that affect the selection of these materials, adhesives and cements, as well as show cases to demonstrate their use in different clinical situations.

- **Release Date:** February 28, 2019
- **CE Credits:** 1 Credit

- **Course Title:** Restoring Caries and Preventing New Disease: A Winning Combination
- **Course Instructor:** Dr. Pamela Maragliano-Muniz
- **Description:** We have to consider the environment where we place our restorations. There are numerous oral environmental factors that contribute to caries and if not carefully considered, it can severely

compromise the longevity of our restorations. There are new technologies available to not only promote favorable long-term outcomes in our restorations, but also to create an environment conducive to dental health. This webinar will discuss the factors that contribute to caries, restorative options, including glass ionomer technology and techniques to create therapeutic restorations and preventive recommendations to minimize caries risk.

- **Release Date:** March 27, 2019
- **CE Credits:** 1 Credit
