FOR IMMEDIATE RELEASE:

Alsip, IL –March 2016 - GC America Inc. introduces **Ceramic Primer II Unit Dose**, primer for ceramic and composite bonding.

Ceramic Primer II Unit Dose is a priming agent designed to treat the adherent surface of ceramic and composite prostheses to promote a strong bond to resin-based materials such as resin-based cements in case of luting procedures or direct composites in case of repairs.

Characteristics and benefits:

- Safe bonding to ceramics and hybrid resins including GC America's CERASMART™ Hybrid CAD/CAM Block.
- Intra-oral and extra-oral repair of fractured indirect restorations made of ceramics, hybrid ceramics and composites
