FOR IMMEDIATE RELEASE:

Alsip, IL – June 2016 – GC America Inc. introduces CERASMART® for PLANMILL.

CERASMART BLOCK FOR PLANMILL IS A REVOLUTIONARY BLOCK. IT COMBINES EXCEPTIONAL STRENGTH AND UNPARALLELED AESTHETICS. BEST OF ALL, IT VIRTUALLY WILL NOT CHIP, HAS A FASTER MILLING TIME, AND IS THE EASIEST MATERIAL TO FINISH.

With a revolutionary Flexible Nano Ceramic Matrix structure, CERASMART For Planmill provides unsurpassed physical properties and impact dispersion due to the fully homogeneous and evenly distributed nano ceramic network. CERASMART For Planmill is a unique dental material that combines the best characteristics of a high strength ceramic and a composite. In addition to the highest degree of elasticity, flexibility, strength, and breaking energy, this innovative hybrid nano ceramic helps ensure the best marginal integrity and high strength after bonding. As a result, CERASMART For Planmill is perfectly suited for posterior, anterior, inlay, onlay, and implant restorations and also enables minimum tooth reduction for minimally-invasive restorations. The superior reliability of CERASMART For Planmill, as well as its unmatched aesthetics, milling accuracy, fastest mill time, and self polishing properties are also excellent features. Finally, this tooth-colored, naturally opalescent nano ceramic material offers properties that are almost identical to those of natural teeth, ensuring your patients the most innovative restoration on the market.

FIRST IN CLASS FOR INTRA-ORAL PROPERTIES

- Flexible, tough and fracture resistant
- Retain gloss over time and is self-polishing
- Natural opalescence
- Physical Properties of natural enamel
- High radiopacity
- Highly wear resistant

FIRST IN CLASS FOR FABRICATION PROPERTIES

- Repairable in the mouth
- Very gentle on milling burs
- No need for crystallization firing
- Mills quicker
- Virtually no chipping
