

## GC Initial IQ – One Body, Layering-over-Metal Only four ceramics for all 16 standard shades!

Alsip, Illinois - The new GC Initial IQ – One Body, Layering-over-Metal concept enables dental technicians to achieve simple and economical reproduction of standard Vita shades by application of a single layer. A true one powder build ceramic without compromising esthetics.

Through the development of the Initial IQ- One Body- Layering Concept, GC can now offer a compact ceramic set for the fast and easy reproduction of the standard Vita shades.

This new system enables technicians to reproduce the same esthetic results time and again with fewer materials.

**The secret: Four new Body materials, which can be combined with the proven three-dimensional Lustre Pastes.**

**In unstable economic times and an ever changing industry, GC has developed a revolutionary new material to make laboratories more productive in less time.**

- Crown build-up with only one powder allows full attention to shaping and function
- Fast reproduction of standard Vita® shades following the "Paint by numbers" with Lustre Pastes
- Total compatibility within the existing MC/Initial range and with many alloys
- Saves time and increases productivity by using one powder
- Can be used as an excellent starter module for new ceramists
