FOR IMMEDIATE RELEASE

Introducing

EQUIA® Forte: Quick, Aesthetic and Fluoride Releasing Bulk-Fill Posterior Restorative System

Alsip, IL – November, 2015 – GC America Inc. is excited to announce the launch of EQUIA® Forte, the next generation of EQUIA™.

EQUIA® Forte is an innovative bulk-fill posterior restorative system that combines **EQUIA® Forte Fil** and **EQUIA® Forte Coat**. EQUIA® Forte builds on the impressive clinical performance of the original EQUIA™. With its new glass hybrid technology, improved flexural strength and wear resistance, EQUIA® Forte extends the recommended indication to include stress bearing Class II restorations.

EQUIA® Forte is ideal for Class I, Class II, and Class V restorations. Key benefits of EQUIA® Forte:

- Bulk-fill
- Easy and quick to use
- Not technique sensitive
- Non sticky and packable
- No polymerization shrinkage or shrinkage stress
- Optimal marginal seal that offers long-term resistance to microleakage and discoloration
- High fluoride release at tooth restorative interface with recharge capability
- Outstanding resistance to wear and acid erosion
- Available in 8 aesthetic shades

In comparison to original EQUIA™, EQUIA® Forte extends the indications to include stress bearing Class II restorations, and is available in a brand-new, red packaging. EQUIA® Forte Coat is available as a 4 mL bottle and a NEW 50 unit dose pack (0.1mL each).

GOING GREEN is a priority at GC America! In continuing to care for the environment, GC America is making a shift towards electronic Instructions for Use (IFU). While the EQUIA Forte introductory kits include printed IFUs, the refill packs reference electronic versions on the website.
