GC - the world leader in glass ionomer technology introduces several significant advances.

A class of material whose time has come!

GI LUTING CEMENTS

The First Paste-Paste Automix Resin Reinforced GI Cement

GC FujiCEM™ 2 - Radiopaque resin reinforced glass ionomer cement in paste-paste auto-mix delivery for a consistent mix every time.

**Indications:**
- Cementing metal, PFM, resin, high-strength ceramic crowns, inlays and onlays
- Cementation of metal, ceramic, and fiber posts

**GC Fuji PLUS®**
- Radiopaque resin reinforced glass ionomer luting cement available in capsule delivery and powder-liquid.

**Indications:**
- Cementing metal, porcelain fused to metal PFM, resin, high strength ceramic crowns, bridges, inlays and onlays
- Cementation of metal, ceramic, and fiber posts

**GC Fuji I®**

**Indications:**
- Cementation of metal-based inlays, onlays, crowns, bridges and posts
- Cementing metal, PFM, bridges, inlays and crowns
- Cementing orthodontic bands
- Cementing stainless steel crowns
- Base or liner

Glass Ionomer Material Science Continues to Advance and Grow in Popularity Worldwide... Here’s Why:

<table>
<thead>
<tr>
<th>FEATURES</th>
<th>BENEFITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Self-adhesive, excellent marginal seal</td>
<td>No need for bonding agents</td>
</tr>
<tr>
<td>Continual rechargeable Fluoride release</td>
<td>Releases Fluoride to adjacent tooth structure</td>
</tr>
<tr>
<td>Biocompatible material with coefficient of thermal expansion like tooth structure</td>
<td>Long lasting marginal integrity</td>
</tr>
<tr>
<td>Fast and easy moisture tolerant technique</td>
<td>Time saving/no need for isolation</td>
</tr>
<tr>
<td>The new generation of glass ionomer</td>
<td>Offering vastly improved esthetics and strength indicated for classes I, II, III, IV, &amp; V</td>
</tr>
</tbody>
</table>

**GI RESTORATIVES**

**NEW!**

**EQUIA® Forte** – Bulk-Fill, Fluoride Releasing, Rapid Restorative System. Two-step approach that combines EQUIA Forte Fil and EQUIA Forte Coat.

EQUIA Forte builds on the remarkable clinical performance of original EQUIA and presents an aesthetic and effective alternative to amalgam, composites and composites. 20% higher flexural strength, 21% increased acid resistance and 40% improved wear resistance, when compared to original EQUIA!

**Expanded Indications:**
- Class I Restorations
- Stress and non-stress bearing Class II restorations
- Intermediate restorative
- Class V and Root Surface restorations
- Core build-up

EQUIA Forte Coat now available in unit dose.

**Stronger, Smoother & Wear Resistant**

**GI BASE & LINERS**

**Indications:**
- Class III and V restorations
- Cervical erosions
- Root surface lesions
- Pediatric restorations
- Base or liner (sandwich technique)

**GI SEALANT / SURFACE PROTECTION**

**GC Fuji TRIAGE®** – Innovative sealant and surface protectant. Works in moist environment. Self-curing. Available in capsule delivery in pink or white.

**Indications:**
- Partially erupted molars
- Provides lasting relief of hypersensitivity
- Temporary endodontic sealings - provides effective seal between endodontic seal
- Intermediate restorative for rampant caries – first step in overall treatment

**Glass Ionomer Material Science Continues to Advance and Grow in Popularity Worldwide...**

**More Translucency, More Fluoride, Fast Setting**

**GC Fuji IX GP®, Fuji IX GP® FAST, Fuji IX GP® EXTRA** – Packable posterior restorative. Self-curing. Available in eight Vita®† shades in powder-liquid (GC Fuji IX GP only) and capsule delivery.

**Indications:**
- Class I and II restorations (non stress bearing)
- Core build-ups
- Pediatric / geriatric restorations
- Base or liner (sandwich technique)
- Intermediate restorative
- Long term temporization

GC Fuji IX GP FAST sets twice as fast as GC Fuji IX GP. GC Fuji IX GP EXTRA has an even faster setting time, releases more fluoride and is extra translucent.
