FOR IMMEDIATE RELEASE

GC America introduces:

G-ænial™ Bond Unit Dose

Alsip, IL – August 2014 – GC America Inc. is excited to announce the launch of G-aenial Bond Unit Dose as an addition to the highly rated G-aenial Bond Kit!

G-ænial Bond is a 7th Generation, one-step self-etching bonding agent that builds upon the excellent history of bonding materials from GC America. This product was designed specifically for the “selective etching” technique, meaning that bond strengths will be enhanced no matter what technique (self-etch on dentin or etch-and-rinse on enamel) the professional uses. With improved shear bond strength to both dentin and enamel, this is an excellent choice for all of your bonding needs.

G-ænial Bond offers one step application; improved bond strengths over other leading bonding agents to both enamel and dentin; easy application and is HEMA Free.

For more information on GC America’s products, please visit www.gcamerica.com.
