“Everyday at chairside and in the laboratory, I use G-ænial™ Universal Flo for a myriad of restorative applications. This newer resin technology allows a higher filler loading and reduced interparticle spacing thus improving strength, wear resistance and an increased restorative applicability.”

- Dr. Douglas Terry

Results of G-ænial Universal Flo at 1 Year from The Dental Advisor

- Superior polish and high gloss retention
- Lack of post-operative sensitivity
- Extraordinary wear resistance
- Strength through filler innovation - for Classes I, II, III, IV and V
- Wears like a traditional composite, yet handles like a flowable

The First Truly Universal Injectable Composite
