FOR IMMEDIATE RELEASE

INTRODUCING

G-ænial Sculpt® Light-Cured Universal Compactable Composite G-Premio BOND™ Light-Cured Adhesive

Alsip, IL – July 2015 – GC America Inc. is excited to announce the launch of a new composite restorative, **G-ænial Sculpt®**, and a new universal bonding agent, **G-Premio BOND™**, effective September 1, 2015.

G-ænial Sculpt® is a compactable, universal composite that features the same high density, uniform dispersion nano-filler technology found in G-ænial™ Universal Flo. This creates a resin that is easy to shape, sculpt and polish. G-ænial Sculpt® provides a strong, wear resistant and radiopaque finished restoration with beautiful esthetics. A self-shining effect enables simple rough finishing with a bur to bring the restoration to a beautiful luster and will continue to increase in polish over time with excellent “chameleon” shade match to enamel. This feature helps to provide an exceptional clinical outcome for a wide variety of clinical procedures. It is available in 17 shades in either syringe or unitip delivery. G-ænial Sculpt® was developed to be used in combination with G-ænial™ Universal Flo.

Complementary shades and the unique self-polishing characteristic are present in both G-ænial brands providing clinicians with an excellent option for any direct restorative procedure.

G-Premio BOND™ is a universal (8th generation) bonding agent that is compatible with total-etch, self-etch and selective etch techniques providing excellent versatility. It is perfectly adapted to all direct restorations and can also be used to repair indirect restorations without the use of primer. G-Premio BOND™ can also be used in combination with a silane when repairing glass or hybrid ceramic and is also ideal for hypersensitivity. It is available in a 5 mL bottle with a new silicone cover to enable more precise drop dispensing and a 50 unit dose pack (0.16 mL each).

When using G-ænial Sculpt®, G-ænial™ Universal Flo and G-Premio BOND™ together, a clinician will have the consistent and predictable materials that allow him to create highly esthetic and wear resistant direct restorations. Please note that G-ænial Sculpt® Introductory Kits contain G-Premio BOND™ allowing clinicians to try both products together.
