FOR IMMEDIATE RELEASE

Gradia® Core and GC Fiber Posts from GC America

Alsip, IL – January 2010 - **Gradia Core®** is a dual-cure build-up material with excellent adhesive properties that offers the clinician **one** product for post cementation and core build-up. Gradia Core achieves great handling and stable physical properties.

GC Fiber Posts have a modulus of elasticity similar to dentin. They are radiopaque and translucent in color for easy identification and better esthetics.

Gradia Core and GC Fiber Post products used together provide a comprehensive and reliable system to the DDS. GC America offers a complete portfolio of core build-up (composite and glass ionomer) material – GC America has it all!

If you would like more information on GC America's products, please visit www.gcamerica.com.
