**FOR IMMEDIATE RELEASE**

**GC America introduces:**

**TEMPSMART<sup>®</sup>**  
**Temporary Crown and Bridge Material**

Alsip, IL – June 2016 – GC America Inc. is excited to announce the launch of TEMPSMART<sup>®</sup> temporary crown and bridge material in Canada.

**TEMPSMART<sup>®</sup>** is an innovative, dual-cured, bis-acrylic composite temporary crown and bridge material using microfilled resin (MFR) and nano-filler technologies. TEMPSMART<sup>®</sup> maintains a smooth surface after polishing because of this revolutionary combination. The high density polymer network for TEMPSMART<sup>®</sup> makes it a strong material ideal for any sized provisional.

TEMPSMART<sup>®</sup> is ideal for temporary crowns, bridges, inlays, onlays and veneers, as well as long-term temporary restorations. Key features and benefits of TEMPSMART<sup>®</sup> include:

- First in class fracture toughness for clinical longevity
- Beautiful esthetics as well as high gloss retention
- High flexural strength facilitates multi-unit temporization
- Quick working and setting times for the shortest chairside time
- Low plasticizer/thin oxygen inhibition layer allow for better polymerization

TEMPSMART<sup>®</sup> is available in two delivery systems:

- 48 mL cartridges (1:1 ratio) available in shades A1, A2, A3, A3.5, B1 and BW
- 10 mL syringes available in shades A1, A2, A3, and B1

GC America launched TEMPSMART<sup>®</sup> earlier this year in the United States.
