

are your teeth sensitive?

do you take medication?

do you whiten your teeth?

do you drink soft drinks or alcoholic beverages?

do you wear braces?

is your mouth dry?

are you undergoing chemotherapy?

are you often under stress?

If you answered Yes to any of the above —
MI Paste™/MI Paste Plus™ is for you!

enjoy stronger teeth and better oral health

Over time, your teeth can lose nutrients and strength. Certain everyday activities, aging, consuming acidic foods and drinks, and many other situations can create an oral acid imbalance. When that happens, you could have trouble producing enough saliva that contains the minerals your teeth need to stay strong and healthy.

MI Paste/MI Paste Plus restores those minerals to strengthen your enamel, reduce sensitivity to create a healthy oral environment. With its ability to condition and revitalize teeth by fortifying them with minerals, using MI Paste/MI Paste Plus is like using vitamins for teeth

try GC Dry Mouth Gel

GC Dry Mouth Gel provides comfort to individuals who may be suffering from dry mouth. Dry mouth is a common problem often seen in individuals with impaired production of saliva from medications, radiation treatment, and diseases that have damaged the salivary glands. Other possible causes of dry mouth may include insufficient water intake, dehydration from physical activity, mouth breathing, smoking, and dehydration from alcoholic or caffeinated beverages

GC Dry Mouth Gel was designed to ease the symptoms of dry mouth. It has a neutral pH and is sugar and alcohol free. It comes in five delicious flavors: fruit salad, lemon, mint, orange and raspberry.

Talk with your dental professional today about ordering and how MI Paste/MI Paste Plus can help strengthen, protect and condition your teeth. Also ask about GC Dry Mouth Gel.

GC America: Enhancing Nature Through Science™

MI Paste™ & MI Paste Plus™

the latest technology
for strengthening and
protecting your teeth

what is MI Paste™/MI Paste Plus™?

MI Paste/MI Paste Plus is a one-of-a-kind product. The only dental product with RECALDENT™ (CPP-ACP), a special milk-derived protein that's a breakthrough in oral health care and completely safe, even if you're lactose intolerant.¹

MI Paste Plus offers the same great benefits of MI Paste, plus the benefit of fluoride. MI Paste Plus contains 900 ppm of sodium fluoride to further promote remineralization and protect from the development of cavities.

MI Paste/MI Paste Plus works by strengthening your teeth with replenishing calcium and phosphate. RECALDENT™ (CPP-ACP) releases these vital minerals into your mouth when they're needed to help produce a saliva-like environment that helps to maintain a normal pH level and healthy teeth.

MI Paste/MI Paste Plus can help condition, protect and rebuild your tooth surfaces, keeping your smile vibrant for a lifetime.

who should use MI Paste/ MI Paste Plus?

MI Paste/MI Paste Plus can be used to strengthen your teeth. It is especially helpful if you experience any of the following:

- Sensitivity from hot and cold, after bleaching or whitening and after a professional cleaning
- Orthodontic patients to prevent white spots and remineralize existing white spots
- Relieve dry mouth symptoms caused by medications, chemotherapy or head/neck radiation
- Buffer high oral acid levels from soft drinks or alcoholic beverages

1) MI Paste contains casein (milk protein) and should not be used if patients have an IgE casein allergy or with a sensitivity or allergy to benzoate preservatives. RECALDENT™ CPP-ACP is milk-derived with lactose content less than 0.01%.

2) Results vary according to conditions. For post-whitening sensitivity, the results can be instantaneous; results for most other conditions range from a few weeks to a few months.

it's easy to use

Using your finger, cotton swab, or custom tray, apply a pea sized amount of MI Paste/MI Paste Plus to your teeth and leave undisturbed for 3 minutes. Do not eat or drink for 30 minutes following application. It's completely safe to swallow or you may spit it out. That's all there is to it!²

Regular use with MI Paste/MI Paste Plus means:

- Stronger, healthier teeth
- Whitening that gives a longer lasting instantaneous gloss
- Less chance of cavities
- Greater oral soft tissue comfort

MI Paste/MI Paste Plus comes in five delicious flavors: strawberry, melon, mint, tutti-fruitti and vanilla.

MI Paste Plus is not recommended for children 6 years and under.

1) Squeeze a small amount onto finger.

2) Apply to teeth, using the tongue to spread over the entire area.

3) Leave on for at least 3 minutes. Expectorate, but do not rinse. Leave the excess to slowly dissipate.
