FOR IMMEDIATE RELEASE:

MI Varnish™ with RECALDENT™ (CPP-ACP)
Topical Fluoride Varnish with Calcium and Phosphate
Now Available: FRESH MINT!

Alsip, IL – May 2013 - GC America Inc. is excited to announce a new Fresh Mint flavor for MI Varnish™, a 5% sodium fluoride varnish with RECALDENT™ (CPP-ACP). MI Varnish is unique compared to all the other fluoride varnishes; MI Varnish with RECALDENT™ (CPP-ACP) brings bio-available calcium, phosphate and fluoride to the tooth surface releasing high levels of fluoride. Working in concert with sodium fluoride (NaF) and RECALDENT™ in MI Varnish is a wiser clinical choice for you and your patients.

MI Varnish is indicated for the treatment of hypersensitive teeth. It is well known that fluoride is an important tool. Fluoride's benefits are boosted by calcium and phosphate supplements helping to maintain a healthy oral environment. MI Varnish with RECALDENT™ (CPP-ACP), provides these essential minerals to reduce hypersensitivity.

MI Varnish Fresh Mint is a new addition to the RECALDENT™ (CPP-ACP) family. MI Paste and MI Paste Plus (900 ppm fluoride), are one-of-a-kind products that enrich saliva. RECALDENT™ (CPP-ACP), is a special milk-derived protein, releasing calcium, phosphate and fluoride (CPP-ACPF).

MI Varnish Fresh Mint is available in a 50 unit dose box. The unique unit dose containers are easy to open and contain enough material for any full mouth application. An application of MI Varnish is smooth and dries clear. Fresh Mint and Fresh Strawberry are popular flavors for all ages.

GC America's offering of MI Varnish and MI Paste™ or MI Paste Plus™ provides a comprehensive system for the dental professional:

MI Varnish in-office - MI Paste or MI Paste Plus at home!

MI Varnish, used in conjunction with MI Paste and MI Paste Plus with RECALDENT™ (CPP-ACP), results in a well-rounded treatment plan.

MI Varnish Fresh Mint will be available **July 1, 2013** from GC America's Authorized Dental Dealers. It is a great complement to GC America's line of preventive and caries risk assessment products that include MI Paste and MI Paste Plus, Saliva Check BUFFER and newly introduced GC Tri Plaque ID Gel™. These products bring awareness of the importance of saliva and provide the dental professional valuable information to help determine treatment choices and strategies.
