FOR IMMEDIATE RELEASE:

Alsip, IL - May 2012 - GC America Inc. introduces **GC Initial™ INmetalbond**, a buffer between GC Initial metal ceramics and dental alloys.

GC Initial INmetalbond is a bonder that is used as an intermediate coat between the alloy and the ceramic. It blocks escaping metal oxides and neutralizes differences in the expansion coefficient. **GC Initial INmetalbond** will be available August 1, 2012.

Characteristics and benefits:

- Easy to apply
- Ready-to-use paste
- Neutralizes differences in the expansion coefficient between GC Initial metal ceramics and dental alloys
- Improves and secures the chemical bond on various types of alloys
- Allows a wider span of CTE compatibility

Packages:

GC Initial INmetalbond
877050 8 g paste (2 x 4 g paste)
