**FOR IMMEDIATE RELEASE**

**MI Varnish™ with RECALDENT™ (CPP-ACP)**

*Topical Fluoride Varnish with Calcium and Phosphate*

***Now Available: Cost Effective Packaging - FRESH MINT and FRESH STRAWBERRY!***

Alsip, IL – April, 2018 - GC America Inc. is excited to announce new cost effective packaging for MI Varnish™. The new product will be available in a 50 pack box of 0.40 mL disposable unit doses on June 1st, 2018. MI Varnish will be available in fresh mint and strawberry flavors from GC America's authorized Canadian dealers and will be priced approximately 30% less than previous packaging.

MI Varnish is a 5% sodium fluoride varnish with RECALDENT™ (CPP-ACP) technology. MI Varnish with RECALDENT™ (CPP-ACP) brings bio-available calcium, phosphate and fluoride to the tooth surface releasing high levels of fluoride. Working in conjunction with sodium fluoride (NaF) and RECALDENT™, MI Varnish is a wiser clinical choice for you and your patients. MI Varnish is indicated for the treatment of hypersensitive teeth; its fluoride benefits are boosted by calcium and phosphate supplements that help maintain a healthy oral environment.

MI Varnish will be available in a box of 50 unit doses. The unique unit dose containers are easy to open and contain enough material for any full mouth application. An application of MI Varnish goes on smooth, does not clump and dries clear. GC America's offering of MI Varnish, MI Paste and MI Paste Plus provides a comprehensive system for the dental professional.

***MI Varnish in-office - MI Paste or MI Paste Plus at-home!***

MI Varnish, used in conjunction with MI Paste or MI Paste Plus with RECALDENT™ (CPP-ACP), results in a well-rounded treatment plan. It is a great complement to GC America's line of preventive and caries risk assessment products that also include Saliva Check BUFFER and GC Tri Plaque ID Gel™. These products bring awareness of the importance of saliva and provide the dental professional valuable information to help determine treatment choices and strategies.
